Supporting the Health and Lives of People Around the World Amino Acids for Pharmaceuticals and Foods

Today, we would like to introduce our “Amino Acids for Pharmaceuticals and Foods” business.

As a leading company in amino acids, the Ajinomoto Group has expanded its business into various fields over 100 years of amino acid research and development.

Our amino acid for Pharmaceuticals and Foods business began in 1956, when our products were used in world's first infusion solutions containing amino acids. We have continued to expand our product lineups and applications, by leveraging the fermentation technology developed in the production of our umami seasoning “AJI-NO-MOTO®,” along with the advancements in amino acid separation/purification technologies.

In the 1980s, we established production locations internationally, and today we have a robust global supply chain with 7 production sites across 4 countries. Under strict quality control and a resilient supply structure, we provide more than 30 types of high-quality amino acid products. By consistently meeting the strict quality requirements and diverse needs of our customers across various fields, we continue to contribute to the business success of customers worldwide through stable supply.

We invite you to take a look at our dedicated team around the world at our plants, quality, and sales, who are working to support the health and lives of people.
