

Advancing Solutions and Strengthening Partnerships in the agrifood system Sector Report from COP30

COP30: the 30th meeting of the Conference of the Parties (COP) to the UNFCCC

The Ajinomoto Group participated in COP30, held in Belém, Brazil in November 2025. Together with the Government of Japan and like-minded companies, we emphasized the need to expand financing for the agricultural sector and to strengthen broad-based partnerships. In addition, we presented our initiatives in the agrifood systems sector.

As a company relies on natural capital, we presented "AminoScience" - based solutions - including *AjiPro®-L*¹ and Biostimulant products² that contribute to GHG reduction and the transformation of agriculture and livestock production. Throughout the event, our CEO Nakamura, along with executives and employees, engaged in dialogue with a wide range of stakeholders to strengthen international collaboration. During the conference, we spoke at more than ten sessions - recording the highest number of appearances among private companies at the Japan Pavilion.

Through messages from our executives who took the stage at COP30 and voices from employees working in the field, we invite you to explore how the Ajinomoto Group is advancing sustainability, aiming to create both social and economic value.

¹ AjiPro®-L: A lysine formulation for cattle feed that supplements the essential amino acid lysine, which cattle tend to lack, helping to balance amino acid composition.

² Biostimulant products: Agricultural materials that blend amino acids and other ingredients derived from fermentation microorganisms with natural extracts and other natural materials to promote plants' innate immunity and growth.
