

## **Ajinomoto Group to Form Ajinomoto Food Manufacturing Co., Ltd., a New Company in Charge of Manufacturing and Packaging of Seasonings and Processed Foods in Japan, in April 2019**

**Part of the Restructuring of the Japan Food Products Production System**

**TOKYO, September 27, 2018** – Ajinomoto Co., Inc. (“Ajinomoto Co.”) will form a new company in April 2019 in charge of manufacturing and packaging of seasonings and processed foods in Japan, in accordance with the details announced in its September 29, 2017 press release entitled “Ajinomoto Group to Restructure Seasonings and Processed Foods Production System in Japan.” The new company will integrate the seasonings and processed foods manufacturing and packaging business of its Kawasaki Administration & Coordination Office and Tokai Plant, the manufacturing and packaging business of AJINOMOTO PACKAGING INC. and Knorr Foods Co., Ltd. The name of the new company will be “Ajinomoto Food Manufacturing Co., Ltd.”

Ajinomoto Co. is restructuring the value chain of its Japan Food Products business as one of the key strategies in its FY2017-2019 Medium-Term Management Plan. Under this strategy, it is consolidating and restructuring its food products production system in Japan with the formation of this new company and a total investment of approximately JPY 40 billion. In accordance with the details announced in its October 20, 2017 press release entitled “Ajinomoto Group to Build a New Plant for Manufacturing and Packaging Seasonings and Other Products,” Ajinomoto Co. has already begun construction of a new integrated manufacturing and packaging plant for seasonings and other products at an investment of approximately JPY 15 billion. The manufacturing and packaging functions of the Kansai Plant of the current AJINOMOTO PACKAGING INC. will be transferred and consolidated to the new plant located on the premises of Ajinomoto Co.’s Tokai Plant. The new plant is scheduled for completion in the second half of fiscal 2019. By conducting further restructuring in the future to consolidate production bases in Japan for seasonings and processed foods in three locations (Kawasaki, Shizuoka and Mie) during fiscal 2021 and by applying leading-edge technologies, including ICT and automation to dramatically raise efficiency, Ajinomoto Co. aims to achieve a world-class level of production that meets customer demand flexibly and quickly. As a result of this consolidation and reorganization and the concurrent increase in production, Ajinomoto Co. aims to raise the business profit margin of the businesses involved by approximately 2%, thus improving EBITDA by approximately JPY 7.0 billion annually from fiscal 2022 onward, in line with its initial plan.

To realize its corporate message, “Eat Well, Live Well,” the Ajinomoto Group is strengthening its value chain to steadily deliver products that customers can enjoy with peace of mind, and to contribute further to advances in food and health for consumers.

The impact of the restructuring described in this news release on Ajinomoto Co.’s consolidated business results for fiscal 2018 will be immaterial.
